

**PROJECT DATA SHEET**

**PROJECT:** NESTLÈ FILLING ROOM EXPANSION  
**LOCATION:** NESTLÈ PLANT, VALSAYN  
**OWNER:** NESTLÈ TRINIDAD LIMITED  
**CLIENT:** NESTLÈ TRINIDAD LIMITED  
**SECTOR:** INDUSTRIAL  
**PROJECT COMPLETION:** Mar 2014

**Project Description**

This project entailed the review and update of a proposed design for the expansion of the existing Filling Room area. For space reasons, a major re-configuration of the process space was required by Nestle and our brief was to assess and re-design the proposed structural and architectural space layouts.

The overall project specifications were as follows:

- Demolition of existing structural members and walls
- Re-design a new frame to accommodate a new wall and space expansion.
- Develop our designs in a manner that ensured continuous filling operations during construction
- Provide site supervision and quality assurance to the selected works contractor.

**Our role**

- Conduct site investigations and as-built condition assessments.
- Carry out the field assessment of the proposed building and structural modifications.
- Review the provisions for the new structural framing and Carry out a detailed structural analysis and design of the proposed framing configuration, new access platform and pipe supports
- Client liaison
- Contractor supervision and technical support.
