

PROJECT DATA SHEET

PROJECT: WIRELINE EXPANSION
LOCATION: LA ROMAINE, TRINIDAD
OWNER: SCHLUMBERGER TRINIDAD INC.
CLIENT: SCHLUMBERGER TRINIDAD INC.
SECTOR: ENERGY
PROJECT COMPLETION: June 2014

Project Description

We were awarded this contract on the basis of providing a full and independent 3rd party review and technical audit service to Schlumberger Trinidad Inc. for a major expansion of their existing facility at La Romaine, Trinidad. Our scope encompassed a full review of the design and construction entities, onsite fortnightly audits, contract review, and provision of recommendations to the Client.

Our role

We were appointed by Schlumberger to provide detailed 3rd Party Review services that covered the design of a major and strategic expansion of the existing Wireline Facility. As both a Consultant and Contractor had already been appointed by Schlumberger, our role involved providing an independent opinion as to contract adherence, conformance to current design and construction practice, and provision of recommendations for similar future works undertaken by Schlumberger.

In particular, our remit involved the following:

- Review the technical documentation and design of the Consultants.
- Provide overview to the Contractor in ensuring their compliance with the contract specifications
- Carry out fortnightly site inspections and audits on the contract progression and adherence
- Conduct offsite audits and reviews of major suppliers and subcontractors to the project
- Provide detailed audit reports on a fortnightly basis to Schlumberger
- Provide overview audit and review for all disciplines covering Architectural, Structural, Civil, Mechanical, Electrical and Plumbing works.
