

**PROJECT DATA SHEET**

**PROJECT:** SOLOMON HOCHOY HIGHWAY  
**LOCATION:** TRINIDAD  
**OWNER:** GOVERNMENT OF TRINIDAD & TOBAGO  
**CLIENT:** W S ATKINS & PARTNERS  
**SECTOR:** INFRASTRUCTURE  
**PROJECT VALUE:** TT\$20m  
**PROJECT COMPLETION:** Sep 2005

**Project Description**

This project consisted of an analysis of the major aggregate materials used on a major highway refurbishment and upgrade. W S Atkins were appointed to study and report on the integrity of the on-island supplier quarries, processing facilities, quality of aggregate and historical management of this component of the upgrade.

Rivelin Consultants Limited was appointed by the Client as their local liaison partner in the execution of the research and sample collection. We also acted as the W S Atkins representative on this project.

**Our role**

- Co-ordinate site visits to selected quarries within Trinidad & Tobago. Such quarries were Fujitsu, Studley Park (Tobago), Dipcon Quarries, Seereeram Quarries, PTF Mining.
- Secure representative samples of processed and unprocessed rock for overseas testing
- Act as liaison for W S Atkins in the establishment of meetings and discussions with parties.
- Provide on-site support for members of the W S Atkins team.
